

Student Answer Sheet

Name: Aarav Sharma | ID: STU001

Subject: Science | Class: 10A | Practice Test

Q1:

Photosynthesis is when plants make food using sunlight, water and CO₂. They produce glucose and oxygen. It happens in chloroplasts.

Q2:

$F = ma$. Force equals mass times acceleration. More force means more acceleration.

Q3:

DNA is a double helix with two strands. It has bases A, T, G, C. A pairs with T and G pairs with C. Found in nucleus.

Q4:

Mitosis makes 2 cells that are same. Meiosis makes 4 cells that are different. Mitosis is for growth, meiosis is for reproduction.

Q5:

Water evaporates from ocean, forms clouds, falls as rain, collects in rivers and ocean again.

Q6:

Heart has 4 chambers. Right side sends blood to lungs, left side sends blood to body. It beats 72 times per minute.
